Dear Matt

**Re: Recognition of Koers & Associates In Kind Support for Fish Habitat Restoration at Shelly Pond**

It has come to my attention that over the past few months, you and your staff have provided valuable engineering time and drafting expertise to assist our Society to develop a strategy to restore salmon habitat at Shelly Creek. The reason for my letter is to thank you for “reducing and waiving” the fees and costs you would normally charge for these services, as shown in a pair of invoices we have received (2004-01 and 02).

We are lucky to receive your professional services and the resulting conceptual site plan as “in-kind” support for this salmon habitat restoration project, funded by the Pacific Salmon Foundation. We will certainly inform our funders of your generous contribution to this project, when we report out at the end of the project. Thanks again.

Yours truly

Peter Law  
Mid Vancouver Island Habitat Enhancement Society
